ACTION: Request for comment.

SUMMARY: OSHA solicits comment concerning its proposal to increase the existing burden-hour estimates for, and to extend OMB approval of, the information-collection requirements of the Electrical Standards for

Construction (29 CFR part 1926, subpart K).¹ These standards specify: Written descriptions of, and testing records for, the assured-equipment grounding-conductor program; warning labels and marks to alert employees to hazardous electrical conditions; and tags to warn against energizing circuits and equipment on which employees are working. Accordingly, these standards prevent deaths and severe injuries among construction employees caused by high-voltage electrical hazards.

DATES: Submit written comments on or before February 19, 2002.

ADDRESSES: Submit written comments to the Docket Office, Docket No. ICR-1218-0130(2002), OSHA, U.S. Department of Labor, Room N-2625, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693-2350. SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information-collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are understandable, and OSHA's estimate of the information-collection burden is correct.

The Electrical Standards for Construction contain a number of paperwork requirements. The following sections describe these requirements in detail.

Section 1926.404(b)(1)(iii) ("Wiring design and protection"). This paragraph requires construction employers who elect not to use ground-fault-circuit interrupters at a job site to establish and implement an assured-equipment grounding-conductor (AEGC) program. This program must cover cord sets, receptacles (that are not part of the building or structure), and equipment connected by cord and plug that employees use, or is available for their use, at construction sites. An employer must ensure that the AEGC program has a written description of the program,
